Strategic Alignment Assessment

Aligning Information Technology with Corporate Strategy

The National Bank of Egypt (NBE)

To what extent do NBE's IT practices serve its overall corporate strategy?

Prepared by: Ahmed Awad | Tariq Salama | Ahmed Sabri | Mahmoud Ibrahim

Instructor: Dr. Ghada

Date: 03-06-2026

1 The Company Strategy

Founded in 1898, NBE is Egypt's largest bank and a primary engine of the national economy. Its corporate strategy rests on four pillars.

EGP 8.13tn

Total assets (2024)

~20M

Customers served

~665

Branches & units

~30,000

Employees

Lead Financial Inclusion

Bank the unbanked across Egypt through accessible, low-cost digital and microfinance services.

Finance the National Economy

Fund mega-projects, infrastructure, and SMEs as the government's key banking partner.

Customer-Centric Digital Growth

Deliver fast, 24/7, personalized banking and grow the tech-savvy youth segment.

Sustainability & ESG

Embed an EESG framework and a climate-finance strategy across all operations.

2 The IT Strategy & Practices

NBE runs an enterprise-grade IT estate that powers its scale and its digital ambition, organized across four domains.

Core Systems

- Oracle Flexcube core banking with real-time processing
- Oracle E-Business Suite ERP and HRMS
- Modernized data and security infrastructure

Digital Channels

- NBE Mobile app and Al Ahly Net internet banking
- NBE PhoneCash e-wallet; bill payment via Fawry
- Nationwide ATM and branch network

Innovation & Partnerships

- Mastercard AI digital humans (first in the Middle East)
- Drove the Apple Pay launch in Egypt (2024)
- Fintech arms: Al Ahly Momken and Al Ahly Tamkeen

Cybersecurity

- BIO-key PortalGuard identity and access management
- MFA and single sign-on for 30,000 employees
- Security Operations Center with risk analytics

3 Strategy Alignment

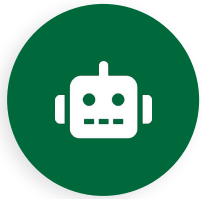

To what extent do NBE's IT practices serve its strategy? We map each strategic goal to its IT enabler and rate the alignment.

Lead financial inclusion	Mobile app, e-wallet, Meeza, Al Ahly Momken and Tamkeen	✓ Strong
Finance the national economy	Scalable core banking and digital lending at national scale	✓ Strong
Customer-centric digital growth	NBE Mobile, AI digital humans, Apple Pay, omnichannel	✓ Strong
Sustainability and ESG	Paperless digital channels; green-IT and ESG data still maturing	⌚ Moderate

Overall verdict: High alignment. IT is a core strategic enabler at NBE, not a back-office support function. **Watch-outs:** legacy-system integration, data-analytics maturity, cloud adoption, and ESG-aligned IT.

4 Recommendations to the Board

Six technologies to deepen alignment and extend NBE's leadership, drawn from the IT Strategy course.

Generative AI

Deploy GenAI assistants for customer service and AI-driven credit scoring.

Advanced Analytics

Use big-data analytics and hyper-personalization to grow share of wallet.

Cloud Adoption

Migrate suitable workloads to the cloud for scalability and lower cost.

Open Banking & APIs

Open secure APIs to enable embedded finance and a fintech ecosystem.

Zero-Trust Security

Adopt zero-trust architecture and AI-based real-time fraud detection.

Green IT for ESG

Use green data centers and ESG data platforms for sustainability reporting.
